Mint Type II Finishes

Experiments at the Philadelphia Mint in 1900 led to a change of finishing bronze medals struck there, somewhat in imitation of the Paris Mint. While this was not entirely implemented until 1910, both 19th century finish and the new finish were available from the Mint for some time. This series forms an interesting collector opportunity because the U.S. Mint has phased out many of these medals. All are 74.6mm unless otherwise noted.

The Society of Medalists is a nonprofit art medal collectors' organization that has issued two medals a year since 1930. These comprise the oldest non-governmental series of medals in America today. Each medal is by a different distinguished American artist whose bas-relief work is reduced to medallic size and struck in the form of a fine art medal. The series contains a wide variety of topics, patinas, styles, and even shapes. The series is struck by Medallic Art Co. Many base their membership on descent from ancestors who were part of the colonial era, the American Revolution or the subsequent wars of the United States. Their insignia are in many cases of great intricacy and beauty, rivalling the orders and decorations of Europe and outshining the awards of the U.S. government. Most are described and illustrated (embossed in full color) in *American Orders and Societies and their Decorations*, published in 1917 by Bailey,

Banks and Biddle of Philadelphia. This important book is itself a desirable collectors' item.
